

SNOW

# RANDAS

Complimentary to the freeride foil kite Luis, JN enters the free-style scene with the Randas. The Randas constitutes the pendant to the tube kite handling at snow grounds.

Randas

## FACTS

The huge lift and hangtime potential, the tight and dynamic turnings and the stable, dynamically flying performance set new standards at hard grounds. Due to the incredible punch and dynamically, stable flying performance the Randas will enable you to boost the freestyle moves on snow, which you've learned during your summer sessions. Although the Randas is a true-blue freestyle kite, freeriders will also get their money's worth. Convince yourself and feel the unrivalled foil, Randas!

	JN Randas
<b>JN Concept</b>	open cell
<b>Performance Style</b>	freestyle, freeride
<b>Size (tbc)</b>	6, 8, 10.5
<b>Aspect Ratio</b>	moderate
<b>Lines</b>	4 lines
<b>Flying Speed</b>	fast
<b>Lift Potential</b>	powerful
<b>Hang Time</b>	soaring potential
<b>Upwind Ability</b>	very good
<b>Turning Seed</b>	high
<b>Depower Abilities</b>	large
<b>Wind Range</b>	high
<b>Power Development</b>	soft linear power development
<b>Handling</b>	direct reacting kite

Randas

# TECHNOLOGY

### CHARACTERISTICS

- Never-seen lift from foilkites
- Extended hangtime
- Tight, direct turnings
- Direct bar feedback
- Dynamically flying performance
- Wide wind range and great upwind performance
- Moderate punch in kitemoops

### MAIN FEATURES

- Backline Bridge for easy landing, safety and reverse launching
- High end manufacturing
- Sophisticated bridle setup
- Durable and light sailcloth
- Size optimized vents for perfect shape profiling

Freestyle Freeride  
6 / 8 / 10.5

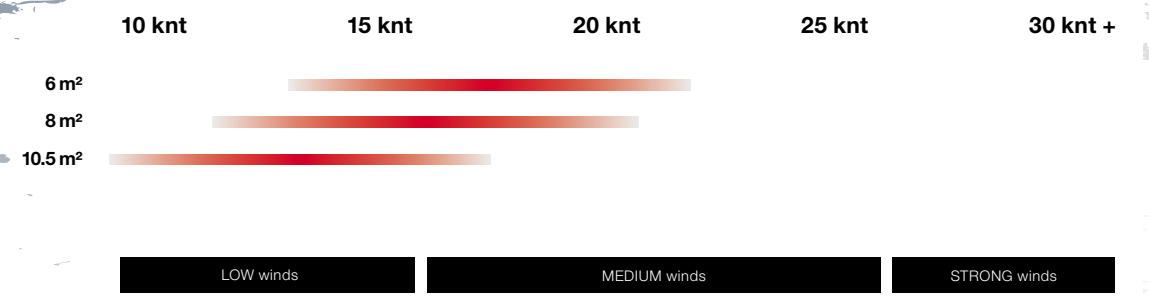

### COLOR RANGE

### WIND RANGE CHART

This chart applies to riders with a body weight of 75 kg and depends on riders weight, skills and board.
